We are indebted to H. K. Porter & Co., of Pittsburg, Pa., builders of logging locomotives, for the principal part of the above information. From them also we learn that on a 18 mile haul a large job was completed at a cost for hauling (not including loading), of 25 cents per thousand feet, and a total cost from stump to delivery of \$2.50 per thousand feet. On a job of 20,000,000 feet, with a five mile haul from stump to river, work done wholly in summer, the total cost was \$2.00 per thousand, while on a 50,000,000 ft. job, six and a half mile haul, a cost of \$3.75 was realized, the work being done in the winter increasing the expense over summer work.

STATE RAILROAD MAP

Fine One Published Under and by Direction of the State Corporation Commission and Copies Being Received—Over a Thousand Miles of Railroad in This State, Not Including Lumber Lines.

Copies of a new railroad map of North Carolina, authorized by the State Corporation Commission, are being received. The map was prepared by Secretary Henry C. Brown, of the Commission, and is most valuable. It shows how the State is traversed by railroads, and the showing includes all railroads no matter the size, and it shows the counties, the county seats and every town of more than 50 population. The railroad development shown is splendid, though when the map is revised it will make even a better showing, as even now there are some important lines to be constructed.

INSERT

New Railroads.

The new railroads appearing on the map, 1902 issue, are as follows: Appalachian Railway, Asheville and East Tennessee, Atlantic and Western, Alma Railroad, Bee Tree Railroad, Blue Ridge and Atlantic, Carthage and Pinehurst, Carolina Valley, Durham and Southern, Carolina-Tennessee Southern, Cliffside, Kinston and Carolina, Kinston and Snow Hill, Mattamuskeet, Carolina, Clinchfield and Ohio, Virginia and Carolina Southern, Roanoke River Railway, Tennessee and North Carolina, Washington and Vandemere, Snowbird Valley, Dover and Southbound.

Norfolk and Southern.

The new lines of the Norfolk and Southern Railroad are as follows: Mackey's Ferry to Washington, Washington New Bern, Washington to Raleigh, New Bern to Bayboro, Bayboro to Oriental, Suffolk to Edenton, Beaufort to Elizabeth City, Morehead City to Beaufort, Mackey's Ferry to Columbia. The total Norfolk and Southern new lines, 291 miles, are merged with the old line from the Virginia State line to Edenton, Mackey's Ferry to Beaufort and the Atlantic and North Carolina Railroad, Goldsboro to Morehead City, making in all for this system, 468 miles.

Other Railroads.

The Atlantic Coast Line system has 947 miles; the Seaboard Air Line Railway 617 miles; the Southern Railway, 1,332 miles and miscellaneous railroads, not including lumber roads, 1,023 miles, making a total mileage of 4,387, an increase of 708 miles over the year 1902, when the last railroad map was made.

Lines Extended.

The lines extended are: Aberdeen and Rock Fish, East Carolina Railway, Caldwell and Northern, Durham and Charlotte, Raleigh and Southport, Randolph and Cumberland.

Under Construction.

The lines under construction are: Mattamuskeet Railroad, Elkin and Alleghany, Carolina Tennessee Southern.

Lumber Railroads.

The lumber railroads in the State are, as follows:

Roanoke Railroad and Lumber Company, operating in Camden, Pitt, Beaufort and other counties.

Pine Lumber Railroad Company, operating in Craven county.

Cottingham Lumber Company, operating in Robeson county.

Chowan and Aulander, operating in Bertie county.

Fosbury Lumber and Railroad Company, operating in Halifax county.

Boyce and Buchanan Lumber Railroad, operating in Jackson county.

Whiteville Lumber Company railroad, operating in Cabarrus county.

John L. Roper Lumber Company Railroad, operating in Jones county.

A FACT ABOUT THE "BLUES"

What is known as the "Blues" is seldom occasioned by actual existing external conditions, but in the great majority of cases by a disordered LIVER.

THIS IS A FACT which may be demonstrated by trying a course of

Tutt's Pills

They control and regulate the LIVER. They bring hope and buoyancy to the mind. They bring health and elasticity to the body.

TAKE NO SUBSTITUTE.

NO ELECTROCUTION YET.

Robeson County Condemned Man Will Have to Wait a While.

Today was the date set for the first legal execution by electricity to take place in North Carolina, as at that time William Morrison, colored, who, as will be recalled by the people of this city, was condemned to death in Robeson county, was to have paid the death penalty. However, a postponement has been found necessary, as the following from yesterday's Raleigh News and Observer will show:

"The first execution of a condemned man in the electric chair in North Carolina is not to take place on schedule time, and this is caused by the delay of a manufacturing company of New York.

"On Friday William Morrison, a negro of Robeson county, sentenced to death by electrocution, having been condemned on the charge of rape, was to have paid the penalty, but because the electric apparatus is not ready he gets another lease on life. The New York concern that is making the electric apparatus has not sent the machinery here on time.

"It has been expected until in the last few days that the electric switchboard and death chair would reach Raleigh in time and be installed for use on Friday, but it was learned yesterday that there was no possibility of this, and late yesterday afternoon Governor Kitchin was informed that it would be impossible to carry out the sentence of the law on Friday. Today he will grant a reprieve to Morrison, the time to be sufficient to allow the arrival and installation of the electric death apparatus.

"The General Assembly of 1909 substituted death in the electric chair in place of death by hanging, and the negro Morrison is the first to be sentenced under the new law. At his execution besides the warden or deputy warden, surgeon or physician of the penitentiary, twelve respectable persons shall be present, besides which the counsel, any relatives of the condemned and a minister or ministers of the gospel may be present. The warden, or in his absence the deputy warden is to turn on the death current. If relatives to the degree of fourth cousin apply for the body it shall be given them, the State allowing not exceeding fifty dollars for all burial expenses. If the body is not claimed by any relative it is to be disposed of as other bodies of convicts dying in the penitentiary."

Chief End of Travel.

"So you have been across the ocean 27 times?"

"Yes; but 20 of those trips were practically wasted."

"How is that?"

"I took them before picture post cards came in."—Houston Chronicle.

In Forest Land

by
Douglas Malloch

"The
Lumberman
Poet."

THE humor, philosophy and sentiment of all branches of the great lumber industry are here presented. The first edition was exhausted in four weeks, the book has been so enthusiastically received. More than any other volume of verse it deserves a place in the lumberman's library.

"The lumberman or the logger who fails to secure a copy of this work will miss a great treat," says George W. Hotchkiss, secretary of the Illinois Lumber Dealers' Association. "I find in 'In Forest Land' the kind of touch with the great outdoors that few books contain," says Gifford, Pinchot. "Should grace every lumberman's library," says A. F. Bloomer, of York, Neb. Hundreds of other letters make similar comments.

The book has been designed particularly for gift and library purposes. It is printed in old style type on antique paper, is bound in green silk cloth, gilt top and gold stamped, and illustrated in tint.

Price, \$1.25 a copy postpaid.

The **HAYES DERAIL** is a device for throwing cars off the track. When cars are placed on a sidetrack it is better to drop them off onto the ground by means of a derail than to have them run out onto the main track and cause a serious wreck. Cars which are being loaded on the main track may get away; a derail placed just down hill from the lowest car will drop it onto the ground and stop the rest without damage. Nearly every railroad in North America uses Hayes Derails. More than 80,000 are in track.
